Dear AW:

We thank you for your sample of GERMANY 1942 - it is an interesting program.

It took two of us about 2 hours to complete the program.

Your program has potential. I suggest that you should correct all of your MANY spelling errors (Hittler, cocpit, etc.).

Also, we detected an error. In the disk version, you can be at the locked door of the hanger and type in GO PLANE - thus bypass the necessity of using a key to enter!

I am impressed by the speed of saving/loading the program.

Like I said, it has potential. If you correct the above errors, please let us know. Also, if you come out with any other programs, PLEASE send it to us for possible use!

Thanks. . .

Bob Krotts
