November 18, 1982

Dear Anthony,

Thank you for your submission, "Quest for Fire" (log number S-100582-7). It is evident that you have invested a great deal of time and effort in your program, and we are sorry that we cannot accept it as it now stands.

We do feel, however, that your program has much merit, and we would like you to re-submit it after making the following changes:

1. Please provide an introductory article to accompany the program. Your program, if accepted, would be published on SoftSide DV, and thus requires some introductory text.
2. Allow "I" to be used as an abbreviation for "INVENTORY."
3. Prevent the user from being able to delete the prompt line through use of the left-arrow key.
4. Allow lower-case input, or convert lower-case characters to upper-case.
5. Make the save/load feature use disk I/O instead of cassette I/O.
6. Please correct the spelling of some words within the adventure, such as "SACRAFICE", "NAROW", "REALY", "EXCITONG", and others.

Although we cannot guarantee acceptance of the program once you have modified it, it will certainly receive all due consideration. If you successfully make the changes listed above, your program's chances for acceptance will be very good.

Thank you for your support of SoftSide. We look forward to hearing from you again very soon.

Sincerely,

Richard Bouchard Jr.
